DARK DWELLER

by Gareth Worthington

Fans of Andy Weir and Adrian Tchaikovsky will love this 'science fiction' novel that pairs quantum physics with the Greek Pantheon

From the Big Bang to the Great Titans of Ancient Greece to the near future, *Dark Dweller* explores humanity's importance in the universe. Told through the eyes of several characters, we follow a young girl who claims she has seen all of time and, more importantly, must save everyone from disaster.

Captain Kara Psomas was pronounced dead when her research vessel slammed into Jupiter. More than a century later, the crew of the *Paralus*, a helium mining freighter, find a pristine escape pod with a healthy young girl nestled inside. A girl who claims to be Kara—and she brings a message of doom.

She says she has been waiting in the dark for that exact moment. To be found by that particular crew. Because an ancient cosmic being has tasked her with a sacred responsibility. She claims she must alter the Fulcrum, a lever in time—no matter the cost to the people aboard—or condemn the rest of civilization to a very painful and drawn-out demise.

She sounds convincing. She appears brave. She might well be insane. . .

WE WERE NEVER ALONE

“Action-packed. . . easy to turn pages” - *Kirkus Reviews* on *Children of the Fifth Sun*

“Cinematic, thought provoking, and immersive” - *Booklist* on *It Takes Death to Reach a Star*

“Merging the best of apocalyptic fiction and science fiction” - *Library Journal* on *It Takes Death to Reach a Star*

“An exceptional read” - *Midwest Book Review* on *Condition Black*

Gareth Worthington is an award-winning author of science fiction, fantasy and thrillers. Also a scientist, he currently works in the pharma industry. Gareth is an authority in ancient history, has hand-tagged sharks in California, and trained in various martial arts. Born in England, he has lived around the world, and now resides in Switzerland with his family. **The exclusive hardback edition contains illustrations by Bona Chang.**
